

EASyPLUS Software Configuration for Windows Vista

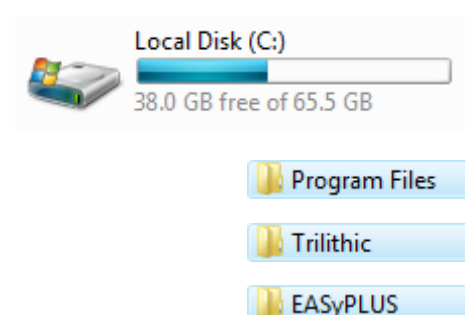

To enable your EASyPLUS software to work with Windows Vista, perform the following steps:

- Send an email to; EASySupport@trilithic.com to request a beta version of the EASyPLUS software that will install on Windows Vista.
- After you have downloaded the EASyPLUS software, you will need to install the software. Locate the file you downloaded and double click the file to start the installation process. Follow the on screen instructions to install the software.
- Before being able to update your EASyPLUS Encoder/Decoder using the EASyPLUS software, you will need to upgrade your firmware. Before using the upgrade firmware tool you will need to make it compatible with Windows Vista. To make the firmware upgrade tool compatible with Windows Vista, perform the following steps:

1. Select the Windows Start Icon to access the Windows Start Menu.
2. Select **Computer**. This will open a window showing all drives connected to your computer.

3. Double click on **Local Disk (C:)** to view the files on your local hard drive.
4. Double click on **Program Files**.
5. Double click on **Trilithic**.
6. Double click on **EASyPLUS**.

- The EPflash Properties window will appear. Select the *Compatibility* tab.
- From the *Compatibility* tab, select the **Run this program in compatibility mode for:** check box. By default, the drop-down box will select *Windows XP (Service Pack 2)*.
- Select the **Apply** button and then select the **OK** button.
- Right click on the “EASyPLUSConfig” program and then select “Properties”.
- The EASyPLUSConfig Properties window will appear. Select the *Compatibility* tab and repeat Steps 10 and 11 from above.

Your EASyPLUS software should now be configured for use with Windows Vista.
